

Article Overview

You can obtain cable tray and pipe quotations by contacting suppliers directly, using online quote forms, or referencing published price lists for standard materials and fittings.

Cable Tray Types and Pricing

Cable trays are used to support electrical cables in buildings and industrial installations. Common types include hot-dip galvanized ladder trays, wire mesh/basket trays, aluminum cable bus, and stainless steel trays. Prices are often based on standard lengths (e.g., 2.4 meters) and per-piece fittings such as bends, tees, and reducers . Suppliers like MP Husky provide UL, CSA, and NEMA-compliant systems suitable for industrial, commercial, and nuclear applications .

How to Request a Quotation

- o Direct Supplier Contact: Many manufacturers, such as Eurostrut, allow you to request a quote directly via their webshop or email .
- o Online Marketplaces: Platforms like IndustryNet offer free, no-obligation quotes from multiple suppliers for cable trays, tray covers, fasteners, and pipe support systems .
- o Quotation Checklists: Eaton provides a checklist to ensure all specifications are included when requesting a quote, which helps avoid errors and ensures accurate pricing .

Pipe Support Systems

For pipe quotations, suppliers often provide pipe clamps, hangers, and supports compatible with cable trays. Pricing depends on material (galvanized steel, stainless steel, or aluminum), size, and load capacity. Many cable tray suppliers also offer integrated pipe support solutions.

Tips for Accurate Quotation

- o Specify tray type, material, and finish.
- o Include lengths, fittings, and accessories.
- o Provide installation environment (indoor, outdoor, marine, or industrial).
- o Request multiple supplier quotes to compare pricing and lead times.
- o Confirm compliance standards (UL, CSA, NEMA) if required for your project. By following these steps, you can efficiently obtain accurate quotations for both cable trays and pipe support systems tailored to your project requirements .
