

Can a 600Mbps router be used with fiber optic internet

Preview

Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. While routers are designed to connect to a modem, the type of modem and the connection protocol are where compatibility with fiber becomes a crucial consideration. The core question revolves around how your existing router, typically designed for cable or DSL modems, will interface with the. Here is the topic's answer before we get into the details: yes, you can absolutely use a normal router with a fiber optic internet connection. In fact, the overwhelming majority of fiber internet customers around the world do exactly that -- they keep using a standard Wi-Fi router they already own. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. I worked with the Cybernews research team to review and compare different routers and give.
