

El Salvador Metro uses 800mm deep thermal runways

Preview

The new Line 2 of Salvador Metro integrates the metro stations of the Rotula do Abacaxi and the beach city of Lauro de Freitas in the metropolitan area, passing through the Salvador International Airport, with the Airport metro station. Overview The Salvador Metro (: Metro de Salvador, commonly called Metro or Sistema Metropolitano Salvador-Lauro de Freitas). The project is a Build, Operate, and Transfer (BOT) scheme for the operation of the system in the municipality of Salvador da Bahia, and includes the supply and installation of rolling stock. The current route of Line 1 begins at the underground Lapa station, and runs for 1.4 kilometres (0.87 mi) in Metro tunnels, before emerging to the surface. Brotas station (which serves the stadium).

El Salvador International Airport (MSLP - San Salvador) airport information such as runway length, weather, airport elevation, and fbo directory with aviation fuel prices.

El Salvador does not operate a metro system but maintains bus rapid transit (BRT) services in San Salvador. The country focuses on improving public transportation through integrated bus networks

After taking more than a decade to open its first route, and then opening with only limited service, Metrô Bahia in Salvador is now a modern system carrying thousands of passengers each day.
