

## Article Overview

Haitian pultruded fiberglass cable trays are available at wholesale prices, typically ranging from \$20 to \$150 per meter depending on type, size, and supplier.

## Pricing Overview

The cost of Haitian fiberglass cable trays varies based on tray type, dimensions, and load capacity. Standard ladder-type or solid-bottom trays generally fall within \$20-\$50 per meter for smaller sizes, while larger or heavy-duty trays can reach \$100-\$150 per meter when purchased from wholesale or factory-direct suppliers. Bulk orders often qualify for volume discounts, reducing the per-unit cost significantly.

## Factors Affecting Price

- o **Material and Construction:** Pultruded fiberglass is non-conductive and corrosion-resistant, which can increase cost compared to aluminum or steel trays.
- o **Tray Type:** Ladder trays, solid-bottom trays, trough trays, and wire mesh trays have different manufacturing complexities, affecting price.
- o **Customization:** OEM or factory-direct trays tailored to specific dimensions or load requirements may cost more but ensure compatibility with your electrical system.
- o **Supplier and Shipping:** Prices vary by supplier, and shipping costs can impact the total price, especially for international orders.

## Purchasing Options

- o **Wholesale Platforms:** Websites like Opentip.com offer discounted Haitian fiberglass cable trays with fast delivery and bulk pricing.
- o **Factory Direct:** Ordering directly from manufacturers or distributors can provide competitive pricing and customization options.
- o **Local Distributors:** Depending on your location, local electrical supply companies may stock Haitian fiberglass trays, potentially reducing shipping costs. For accurate pricing, it is recommended to request a quote from suppliers specifying the tray type, length, and load requirements to get the most precise cost estimate.

Enduro's fiberglass cable ladder tray is lightweight but tough enough to withstand the toughest industrial conditions.
