

How much does a Norwegian galvanized cable tray cost

Article Overview

The price of Norwegian galvanized cable trays typically ranges from \$2 to \$25 per meter, depending on material, type, size, and coating.

Pricing Overview

The cost of galvanized cable trays varies based on several factors, including the type of tray, material, surface finish, and order quantity. Galvanized steel trays are the most common, offering a balance of durability and affordability, while stainless steel is more expensive due to corrosion resistance, and aluminum is lightweight but pricier than steel. Pre-galvanized trays are cheaper and suitable for indoor use, whereas hot-dip galvanized trays are recommended for outdoor or harsh environments and cost more upfront.

Types of Cable Trays

- o Ladder-type trays: Stronger, support heavier cables, slightly higher cost.
- o Perforated trays: Allow airflow and drainage, generally more affordable than ladder trays.
- o Solid bottom trays: Rarely used, also called cable channels or troughs, typically more expensive due to material usage.

Cost Influencing Factors

- o Material and coating: Hot-dip galvanization increases durability and price.
- o Size and dimensions: Wider or taller trays cost more per meter.
- o Supplier and location: Prices vary by supplier margins, shipping, and regional labor costs.
- o Bulk orders: Large quantities can reduce the per-meter cost significantly.

Practical Considerations

When budgeting, consider installation costs, shipping, and any additional fittings or brackets required for your project. Norwegian suppliers and international distributors offer bulk discounts and verified deals, which can help optimize costs for large-scale projects. In summary, expect to pay between \$2 and \$25 per meter for Norwegian galvanized cable trays, with the final price influenced by material type, tray design, coating, and order volume.
