

## Preview

Malawi's President Lazarus Chakwera has launched phase II of the country's national fibre backbone project, central to the country's digital transformation. The project is being implemented by Huawei Technologies and will include nearly 3, 000 kilometres of fibre optic. The Optic Fibre Communications (OFC) is a semi-autonomous department within ESCOM that operates a national wide overhead Optic Fibre backbone network strung on electricity infrastructure reaching all parts of the country and the National Data Centre supported by the Malawi Government. The Optic Fibre, to 2027 (ISP27). This strategic plan comes at a time when the electricity industry is emerging from a very difficult time. For the past one year and a quarter, our organisation has been at the centre of focus due to the massive load shedding it was implementing due to the loss of close to 129. The National Fiber Backbone Project is one of the projects the Chinese government is financing in the country. The project is going to be financed through a soft loan from China Exim Bank and will be implemented by Huawei Technologies. The Project is expected to lay Fiber from the northern border. Malawi has embarked on the ambitious Digital Malawi Acceleration Project (DMAP), a \$150 million initiative aimed at enhancing internet accessibility. Among them, the Malawi telecommunications company.
