

Article Overview

Leading Malaysian manufacturers of fiber distribution boxes include Norden Communication, Samudra Communication, DCD Distribution, and Fibconet, offering a range of indoor and outdoor FTTH solutions.

Key Manufacturers and Products

1. Norden Communication Norden is a prominent FTTH fiber distribution box manufacturer in Malaysia, offering the OptiNor range suitable for optical fiber splicing, distribution, and protection. Their boxes are designed for wall-mounted and pole-mounted outdoor applications, with IP65 waterproof protection. They provide compact, lightweight solutions for both internal and external use, featuring splice trays, cable management, locking, and earthing systems for secure fiber connections . 2. Samudra Communication Sdn Bhd Samudra produces fiber optical distribution boxes designed for distribution network construction, suitable for installation inside manholes or on walls and poles. Their products focus on high protection levels and durability for outdoor and indoor environments . 3. DCD Distribution DCD Distribution offers a wide range of fiber optic distribution boxes, including OD wall mount patch panels, outdoor metal termination boxes with splicing trays, and FTTH fiber termination boxes with capacities ranging from 4 to 48 ports. Their products cater to structured cabling and fiber optic network installations across Malaysia . 4. Fibconet Fibconet specializes in customizable fiber distribution boxes for FTTX networks, with over 16 years of experience. Their boxes support splicing, splitting, and distribution, with IP55 protection for outdoor use. Materials include ABS, ABS+PC, PP, and SMC, offering varying levels of impact, temperature, and flame resistance. Fibconet also provides options for adapters, pigtails, and splitters, making their boxes highly adaptable for FTTH, FTTB, and FTTC applications .

Considerations for Selection

- o Protection Level: Outdoor boxes should have at least IP65 for water and dust resistance.
- o Material: Common materials include ABS, ABS+PC, PP, and SMC, with SMC offering the highest durability.
- o Capacity: Boxes range from 4 to 48 cores or more, depending on network requirements.
- o Mounting Options: Wall-mounted, pole-mounted, or manhole installation depending on deployment needs.
- o Customization: Some manufacturers, like Fibconet, offer customizable configurations for adapters, splitters, and pigtails. These manufacturers provide reliable solutions for Malaysian telecom operators, ISPs, and network integrators seeking high-quality fiber distribution boxes for both indoor and outdoor FTTH deployments.
