

Price of a Level 3 Distribution Box with Double Grounding

Article Overview

The price of a Level 3 distribution box with double grounding typically ranges from \$500 to \$2,000, depending on specifications, materials, and safety features.

Pricing Overview

The cost of a distribution box varies widely based on voltage rating, amperage capacity, number of circuits, material construction, and integrated safety features. Standard residential units are generally less expensive, while industrial or commercial-grade boxes with advanced features, such as double grounding, surge protection, and weatherproof enclosures, command higher prices .

- o Material: Plastic enclosures are cheaper, while powder-coated steel or stainless steel units increase the price .
- o Safety Features: Double grounding, arc fault detection, and surge protection add to the cost .
- o Capacity: Higher amperage and multi-circuit configurations increase the price.
- o Environmental Rating: Outdoor-rated, splash-proof, or weather-resistant boxes are more expensive than indoor-rated units .

Example Units

- o The SVB 3 power distribution box features a splash-proof plastic enclosure with multiple 230V Schuko sockets and a CEE plug collar, suitable for light industrial or construction use, though pricing is not listed directly .
- o Industrial-grade boxes with modular configurations, circuit breakers, and advanced monitoring can cost up to \$2,000 or more, depending on customization and integrated technology .

Key Considerations

When budgeting for a Level 3 distribution box with double grounding, consider:

- o Compliance with electrical codes and certifications
 - o Compatibility with existing infrastructure
 - o Long-term durability and maintenance costs
 - o Energy efficiency and monitoring capabilities
- In summary, for a Level 3 distribution box with double grounding, expect to pay between \$500 and \$2,000, with the final price influenced by material quality, safety features, capacity, and environmental protection .
