

Price range of Chinese and European mesh cable trays

Article Overview

Chinese wire mesh cable trays typically range from \$10 to \$50 per meter depending on material and size, while European suppliers generally charge higher, often \$30 to \$100 per meter for comparable trays.

Chinese Mesh Cable Tray Pricing

Chinese manufacturers offer wire mesh or basket cable trays at competitive rates due to factory-direct production and OEM options. Prices vary based on material, size, and coating:

- o Standard steel trays: \$10-\$25 per meter
- o Hot-dip galvanized (HDG) trays: \$20-\$40 per meter
- o Stainless steel (304/316L): \$30-\$50 per meter
- o Custom sizes or OEM orders may increase costs slightly. Additional costs include supports, brackets, and corner fittings, which can add 20-30% to the total project cost. Bulk orders often receive discounts, making Chinese suppliers cost-effective for large-scale installations.

European Mesh Cable Tray Pricing

European suppliers generally charge more due to higher labor, material standards, and certifications. Typical price ranges are:

- o Mild steel trays: \$30-\$60 per meter
- o Aluminum trays: \$40-\$80 per meter
- o Stainless steel trays: \$60-\$100 per meter. European trays often comply with EN standards and may include additional features like fireproof coatings or corrosion resistance, which justify the higher price.

Factors Affecting Price

- o Material: Stainless steel > HDG steel > aluminum > mild steel
- o Size and load capacity: Larger or heavier-duty trays cost more
- o Coating and finish: HDG or powder-coated trays are more expensive
- o Installation components: Brackets, hangers, and bends add 20-30% to the total cost
- o Order volume: Bulk purchases reduce per-meter cost, especially from Chinese suppliers

Summary

- o Chinese mesh cable trays: \$10-\$50 per meter, cost-effective for large projects, with optional customization
- o European mesh cable trays: \$30-\$100 per meter, higher quality standards, suitable for projects requiring

strict compliance

o Total project cost should account for supports, brackets, and installation complexity, not just the tray price. This comparison helps in budgeting and supplier selection for industrial, commercial, or data center cable management projects.
