

Article Overview

The Side-to-Qiguang Module is a Qiguang Communication weak current box module designed for high-speed network connectivity and home or office multimedia management.

Key Features

The Qiguang module functions as a plug-and-play gigabit switch or a customizable multimedia box component. It supports 5 to 8 ports with full 1000M (Gigabit) network speed, making it suitable for connecting computers, TVs, set-top boxes, printers, and network cameras. The module uses the RTL8370N chip and supports IEEE 802.3 standards, including 802.3u, 802.3x, 802.3az, and 802.3ab, ensuring reliable high-speed data transmission.

Hardware and Connectivity

- o Backplane bandwidth: 16Gbps
 - o MAC address capacity: 8K
 - o Ports: Multiple LAN ports with 10/100/1000M adaptive uplink
 - o Cable compatibility: Cat 5, Super Cat 5, Cat 6 UTP cables
 - o Power adapter: 12V/1A DC, compact design
- The module is unmanaged, meaning it requires no complex setup and is ideal for quick installation in home or office networks.

Household Multimedia Applications

Qiguang modules can also be used in household weak current boxes to organize and manage fiber optic cables, multimedia devices, and other network components. The fill-in-the-blank modules allow users to customize the box with different connectors or components based on specific needs. Additionally, threading cable management modules help keep cables organized and reduce clutter, while blank boards can cover unused spaces or support custom configurations.

Installation and Use

The module is designed for easy plug-and-play operation, compatible with standard network devices. It can be installed in vertical iron shells or multimedia boxes, providing a neat and organized network setup for homes or small offices. The compact size and flexible configuration make it suitable for both new installations and upgrades of existing network infrastructure.

Summary

Side-to-Qiguang Module

The Side-to-Qiguang Module is a versatile solution for high-speed network connectivity and multimedia management, offering Gigabit speeds, multiple ports, and customizable configurations. It is ideal for users seeking a reliable, easy-to-install network module for home or office environments, supporting a wide range of devices and ensuring organized cable management .
