

TP-Linked Switch with Aggregation

Preview

Equipped with all-fiber ports, Aggregation Series Switches deliver up to 25 Gbps. With features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, they offer a robust and reliable solution for the aggregation layer of SMB. LAG is short for link aggregation group, including static LAG and LACP (Link Aggregation Control Protocol) two achievement mechanisms. Select models. TP-Link 5-Port Gigabit Ethernet Easy Smart Switch| Plug and Play | Desktop | Sturdy Metal w/Shielded Ports | Limited Lifetime Replacement (TL-SG105E), Black. Need help? Experience the power of link aggregation with versatile managed switches. Explore options with web-based management, VLAN support. TP-Link's JetStream L2+ managed switches provide high performance, powerful L2 and L2+ features like static routing, enterprise-level QoS, advanced security strategies and a bundle of ISP features. Using LACP (Link Aggregation Control Protocol) enabl. more In this video. If the LAN LAG feature on the router is a must in your network, we recommend exploring alternative solutions that may meet your needs.

Ideal for Use in Aggregation Layer 8? 10 Gbps SFP+ Slots Fanless Design for Silent Operation Zero-Touch Provisioning Centralized Management Omada App Ethernet Ring Protection Switching Static

The TL-SG1048 combines ease of use with unsurpassed performance resulting in an exceptional value for any cost-conscious network administrator who wants
