

Article Overview

Top suppliers of high-quality cable tray systems in the UAE include Metar, Unigroup, Hutaib Electricals, and Ruwais Steel, offering durable, corrosion-resistant, and customizable solutions for industrial and commercial projects.

Leading Cable Tray Suppliers

Metar in Dubai manufactures engineered steel cable trays suitable for indoor, outdoor, coastal, and industrial environments. They offer mild steel, pre-galvanized, hot-dip galvanized (HDG), and powder-coated finishes, with custom sizes, thicknesses, and load ratings. Their trays are designed for structural load compliance, long service life, corrosion protection, and ease of installation, making them ideal for large infrastructure projects across the UAE (Metar) . Unigroup provides perforated, ladder, and wire mesh cable trays, as well as GRP (glass-reinforced polyester) systems. Their products are lightweight, corrosion-resistant, and engineered for fire safety and long-term reliability. Unigroup trays are suitable for commercial, industrial, and utility applications, with full support systems and installation accessories available in Dubai, Abu Dhabi, and Sharjah (Unigroup) . Hutaib Electricals offers a wide range of cable trays including ladder, perforated, wire-mesh, and trunking systems. They provide HDG, stainless steel (SS 202/304/316), pre-galvanized, and powder-coated finishes. Hutaib supports custom widths, heights, bends, risers, reducers, and covers, making their solutions suitable for heavy loads, long spans, and coastal or high-humidity environments (Hutaib Electricals) . Ruwais Steel supplies steel, pre-galvanized, HDG, stainless steel, ladder, trunking, and perforated cable trays across the UAE. Their products meet ISO 9001:2008 standards, with rigorous quality testing for tensile strength, dimensional accuracy, and durability. Ruwais Steel focuses on cost-effective, long-lasting cable management systems for industrial and construction projects (Ruwais Steel) .

Key Considerations for UAE Projects

- o Material & Finish: HDG or stainless steel 316 is recommended for coastal or high-humidity areas; pre-galvanized or powder-coated trays are suitable for indoor MEP rooms.
- o Tray Type: Ladder trays are ideal for heavy loads and long spans; perforated trays provide medium load support with airflow; wire-mesh trays are best for IT/ELV applications.
- o Customization: Most suppliers offer custom sizes, bends, and finishes to meet project-specific requirements.
- o Support Systems: Ensure availability of brackets, clamps, risers, and threaded-rod supports for secure installation. These suppliers provide high-quality, durable, and compliant cable tray systems suitable for UAE conditions, ensuring safe and efficient cable management for commercial, industrial, and infrastructure projects.

UAE High-Quality Cable Tray Support

Cable Tray in UAE Cable Trays are support systems used in building electrical wiring. These cable support systems are commonly

A cable tray is a structural system used to support and organize electrical cables in commercial, industrial, and infrastructure
