

Article Overview

Most SFP optical modules come with a limited warranty ranging from 1 year to 5 years, depending on the manufacturer and product family.

Cisco SFP Modules

Cisco offers a 5-year limited hardware warranty on its pluggable modules, including SFPFE, SFPOCX, SFPGE, SFP10G, X2, SFP25G, QSFP40G, QSFP100, and QDD400G product families. This warranty covers defects in materials and workmanship and is effective for products purchased on or after September 7, 2020. Modules purchased before this date are covered under the warranty terms in effect at the time of purchase, which could be 1 year or 90 days depending on the product .

Other Vendors

- o Optcore 16G SFP+ modules are offered with a 5-year warranty, ensuring coverage for defects and supporting long-term reliability in storage area networks (SANs) and other high-speed applications .
- o FS optical transceivers and SFP-DD modules are tested for quality and longevity, and while specific warranty duration may vary, they are designed to maintain stability and performance over extended periods .

Key Considerations

- o Warranty coverage typically includes manufacturing defects but may exclude damage from misuse, improper installation, or environmental factors.
- o Compatibility and certification: Many SFP modules are designed to be compatible with multiple brands (Cisco, Arista, HPE, Juniper), and warranty terms may require using the module with supported equipment .
- o Documentation: Always check the manufacturer's warranty documentation for detailed terms, including return procedures and any registration requirements. In summary, SFP optical modules generally come with a 1- to 5-year limited warranty, with Cisco and Optcore providing 5-year coverage for most modern modules. Users should verify the warranty terms with the specific vendor and product family to ensure proper coverage.

By leveraging third-party modules, businesses can reduce capital expenditure without significantly compromising

Whether you're dealing with SFP, SFP+, QSFP, the FLEXBOX has got you covered. With the FLEXBOX we're able to use our
