An SC adaptor, or Subscriber Connector adaptor, is a device used in fiber optic networks to connect fiber optic cables together or to devices like transceivers, optical receivers, and routers. They are simple, reliable, and suitable for a wide range of optical communication systems, including telecom networks, data centers, LANs, CATV systems, and fiber distribution. A Full Guide to Understanding SC Adaptors and Their Uses What is an SC Adaptor? 1. What is the. AMM offers LSH/E-2000 adapters in different variations. LSH/E-2000 is a high performance connector which meets the highest standards by excellence in design and manufacturing processes. Featuring a convenient push-pull mechanism, the SC Series is designed for single-mode, multi-mode, and APC applications and offers the most reliable optical fiber connections for Telecom. The SC Simplex Fiber Optic Adapter is designed to connect two SC fiber optic connectors with accurate alignment and stable optical performance. With a standard SC interface, blue housing, protective dust caps and a metal retaining clip, it is suitable for FTTH networks, ODF frames, patch panels.
