

What optical module should I use for TP1210PE

Preview

SFP 1000BASE-T Gigabit Ethernet module (uses Cat 5 cable). The optical module serves as a crucial component in optical fiber communication systems, operating at the physical layer, which is the lowest layer in the OSI model. Its primary function is to achieve optoelectronic conversion by converting electrical signals into optical signals and vice versa. An. Select your switch or router brand and model to instantly find compatible OptiModule transceivers. We have compatibility data for the following manufacturers. High-performance optical transceivers for data centers, 5G, and enterprise networks. SFP (Small Form-factor Pluggable) modules are hot-swappable optical or copper transceivers. Depending on the deployment scenario, they support different pluggable optic modules that can be selected based on distance, form factor, and wavelength.
