

What s the cheapest price for galvanized cable trays

Article Overview

The cheapest galvanized cable trays are typically pre-galvanized steel trays, costing around \$2-\$10 per meter depending on type and supplier.

Price Overview

Galvanized cable trays vary in price based on material, coating, and type. Pre-galvanized (PG) steel trays are the most affordable, suitable for dry, indoor environments like offices or schools, and generally cost \$2-\$10 per meter for standard straight sections . Hot-dip galvanized (HDG) trays are more expensive due to a thicker zinc coating, ideal for outdoor or industrial use, and can cost \$10-\$30 per meter . Other factors affecting price include tray type:

- o Ladder trays hold heavy cables but are pricier.
- o Perforated or wire mesh trays are cheaper and suitable for lighter loads .

Supplier Options

- o eBay UK offers competitive deals and sometimes free delivery on galvanized trays, making it a good option for small orders or individual pieces .
- o Amazon UK lists various galvanized trays, often with limited stock, so prices may vary and checking individual product pages is recommended .
- o CEF provides a range of steel cable trays for professional projects, with pricing depending on size and type .

Cost-Saving Tips

- o Buy in bulk: Larger orders reduce per-meter cost.
- o Choose pre-galvanized for indoor use: Avoid unnecessary HDG costs if corrosion resistance is not critical.
- o Consider tray type: Perforated trays can save 15% or more compared to ladder trays .
- o Negotiate with suppliers: Long-term contracts or project-based orders can lower prices. In summary, for the cheapest option, pre-galvanized steel trays purchased online or in bulk are the most cost-effective, typically starting around \$2 per meter, while HDG trays for outdoor durability are higher priced.
