

Will the telecommunications towers be dismantled now

Preview

Hungarian mobile carrier Magyar Telekom has confirmed it will spin off its telecom tower assets. For decades, telecom companies have profited from saturating the environment with radiofrequency (RF) radiation, deploying cell towers next to schools, 5G small cells on streetlights, and rooftop antennas on apartment buildings --all while denying the health risks associated with chronic RF. In March 2026, MB Spezialabbruch GmbH commenced the technically demanding dismantling of a 75-meter-high telecommunications tower constructed in reinforced concrete in Neunkirchen. Due to the structure's height and its massive construction, the project requires a specially developed and technically. The U. government officials and the agency's protective operations. Sometimes, due to technology upgrades, urban expansion, lease issues, or cost inefficiencies, telecom operators must decommission -- or shut down -- certain tower sites. Sounds easy, right? Just switch off and walk. While close to 150 world leaders prepared to descend on Manhattan for the U.
